Visakhapatnam -530045

## Message from ISDT....

Indian Society of Dental Traumatology was founded in 2017 as a society with a difference that visioned to create awareness about traumatic dental injuries both among professionals and the general public, promote innovation in education, develop newer methods of treatment through patient centered relevant research and implement the delivery of high-quality clinical care in prevention & management of traumatic dental injuries. In few years of its existence, it has already created a platform for general dentists and specialists in India for knowledge sharing, awareness, research and development of clinical protocols for excellence in prevention and management of traumatic dental injuries

The VIII National Symposium of the Indian Society of Dental Traumatology has been aimed to bring the clinical experts in the field to the South Eastern part of the country. It's the first event of this association in the state of Andhra Pradesh. Like previous National Events, this one has been crafted to provide the clinically oriented scientific insights to all the delegates with unmatched hospitality which we are known for. The lectures cover Trauma preparedness, Diagnosis, CBCT imaging, Pulp considerations across all injuries, Management of primary tooth trauma, non vital immature permanent teeth, and tooth avulsion. For the first time ISDT has planned two unique sessions of lecture with demonstrations to give real time exposure to all the participants attending TrauMaster. This will be done with in the existing registration Fee and will be of great help to everyone. Looking forward to welcoming you in Vishakhapatnam.

**Dr. Vijay Prakash Mathur**  
President ISDT

**Dr. Nitesh Tewari**  
Secretary ISDT
